RE: Application # 10/827,225

As apparently my letter of 6 June 2008, was never received regarding my patent application, please find this letter.

I have enclosed my Patent claim, and the section that I had requested to pursue.

- 2) What I claim as my invention is: Using the Histamine containing eye drops to identify lymphoid tissue within the eye, that is sampled/ biopsied for further diagnostic testing.

Due to the nature of the patent and it's limited (no) financial future, I was unable to locate a Patent attorney (I could afford to be specific). I did try to follow your advise.

Thanks again for your time and attention to my application. I hope that I have not caused any undue duress. Best of 2009 to you!

Respectfully Submitted,
SC Bender, DVM
